

Tomichi Creek
Highway 50 Corridor
Gunnison County

Working with our long-time partner, the Gunnison Ranchland Conservation Legacy, CCALT has been able to protect more than 14 miles of prime hay meadows and Gunnison sage grouse habitat along Tomichi Creek between Gunnison and Monarch Pass. Over more than a decade of efforts, CCALT, GRCL and other partners have protected more than 15,000 acres in this rapidly growing mountain valley.
